EXPERIENCE

Software Engineer

Aug 2025 – Present

OrderIQ

Remote

- Designed and implemented an end-to-end reservation system for a multi-tenant restaurant platform across POS, web, and mobile, including database schema design, backend API contracts, and a bitmask-based O(n) availability algorithm for real-time scheduling.
- Architected and implemented an incentives system, designing the relational schema and user interfaces to support tier-based rewards, configurable promotions, and earning and redemption flows.
- Built a callback support system across internal and partner-facing web apps with authenticated ticket workflows, durable queue, workload-balanced assignment, and Slack-based agent controls.
- Built and maintained backend architecture and cross-platform product features during a company merger and full system rebuild.

EDUCATION

University of Wisconsin–Madison — *B.S. in Computer Science and Data Science*

Graduated May 2024

PROJECTS

Findly – AI-Powered Candidate Search Platform | [GitHub](#)

- Developed a full-stack application that uses LLM-based parsing to translate natural language queries into structured database filters for candidate search.
- Implemented database-level filtering and keyword-based ranking to prioritize candidates efficiently.
- Generated AI-based match explanations for selected candidates to enhance evaluation.

LogoLess – AI-Driven Video Processing App | [GitHub](#)

- Built a cross-platform React Native application that detects and processes dynamic watermark regions in uploaded videos, integrating FastAPI backend services for media handling.
- Designed computer vision pipelines using OCR and image processing techniques to detect text regions, track motion across frames, and dynamically apply blur masking.

ADDITIONAL EXPERIENCE

Service Bartender, Barback

Nov 2024 – Aug 2025

Hillstone

Denver, CO

- Managed high-volume service in a fast-paced, high-end restaurant environment, ensuring accuracy and efficiency under peak demand.
- Coordinated drink orders and supported front-of-house operations while maintaining service quality.

AI Trainer – Freelance

May 2024 – Dec 2024

Data Annotation Tech

Remote

- Analyzed and compared AI outputs from multiple models on coding and non-coding tasks, assessing correctness, truthfulness, and formatting.

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, JavaScript, Python, React, Next.js, React Native (Expo), Node.js, Express.js

Databases & Tools: PostgreSQL, Prisma, Supabase, Docker, Git, OpenAPI, Tailwind CSS
